

# LIPOSOME CREAM BASE

Letco Medical's Liposome Cream Base provides an elegant alternative to traditional PLO transdermal systems and enhanced transdermal delivery of a wide variety of compounding Active Pharmaceutical Ingredients (API). Liposome Cream Base offers superior emulsion stability and protection against ionic and high API loads. The smooth, creamy texture allows for easy application and leaves no tacky residue.

- Wide range pH stability
- High API load tolerance
- Cosmetically elegant
- Stable at refrigerated and room temperatures

<b>INGREDIENTS</b>	Deionized Water, Lecithin, Isopropyl Myristate, Mineral Oil, Poloxamer 407, Steareth-2, Propylene Glycol, Polysorbate 20, Glycereth Stearate, Panthenol, Glycerin, Glycereth-26, Phenoxyethanol, Methylparaben, Butylparaben, Ethylparaben, Propylparaben, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Triethanolamine, Aloe Vera, Potassium Sorbate, Magnesium Aluminum Silicate, Sodium Benzoate, Sorbic Acid, Ozokerite, Edetate Disodium, Diazolidinyl Urea, Titanium Dioxide, Allantoin	
<b>DESCRIPTION</b>	Opaque, off-white, homogeneous cream	
<b>PH</b>	5.5 - 7.5	
<b>VISCOSITY</b>	140,000 - 195,000 cP	
<b>SPECIFIC GRAVITY</b>	0.9 - 1.1	
<b>STORAGE</b>	Store in a tightly-closed container in a cool, well-ventilated area
