### SUMMARY OF BASES AVAILABLE AT BELLA CORP TRADING Pty Ltd

	TOPICAL BASE (LETCO)	DESCRIPTION	APPLICATIONS (sample formulas available)
	<u>LIPOSOME CREAM BASE</u>	<i>A smooth, creamy, enhanced transdermal base with superior emulsion stability and protection against ionic and high API loads.</i>	<i>Designed to deliver drugs transdermally like a traditional PLO gel. It is easy to apply and leaves no tacky residue.</i>
	<u>MEDIUM CREAM</u>	Fast absorbing, medium viscosity oil-in-water (O/W) emulsion base with emollient properties.	Excellent multipurpose vehicle for hormones, steroids and many other API's. Non-ionic and ester free. Paraben, fragrance and dye free.
	<u>PLASTICISED OINTMENT</u>	Soft elegant anhydrous ointment vehicle. Polyethylene and mineral oil base. Dissolves with the aid of heat.	Used in both oral and topical applications and may be emulsified with cocoa or shea butter.
	<u>SALT DURABLE CREAM</u>  (new)	An elegant compounding base for topical compounded preparations with improved feel over traditional PLO based delivery systems. Ready to use with no need to pre-wet actives or use thickening agents.	For preparations that contain high percentages of, or multiple, active ingredients.
	<u>SEPINEO P600</u>	A thickening, stabilizing and emulsifying option providing a light, non-tacky touch.  Thickener-Stabilizer: 0.5 - 2% Emulsifier (Gels & Creams): 1 - 5%	Suitable for any dermatological preparations. Especially useful for rescuing problem emulsions and creating unique preparations.
	<u>VANISHING CREAM</u>	An easily absorbed non-greasy, oil-in-water (O/W) emulsion base for general compounding use. Wide active and excipient compatibility, cosmetically elegant, non greasy. Fragrance and dye free.	Wide active and excipient compatibility for general compounding use.
